

Invitation

The organisers cordially invite you to participate in the 20th OMCOS. The conference will focus on organometallic chemistry for organic synthesis, both stoichiometric and catalytic. Lectures and posters will cover a broad range of different topics of organometallic chemistry, including contributions on applications in industry. The submissions of abstracts for oral contributions and posters in this area is possible on the conference web site <https://www.omcos2019.de/> now.

Conference Venue

The OMCOS 20 venue is the convention center, Heidelberg, Germany. It is a historical building in the very center of Heidelberg and along the river Neckar. Historical sites in the Old Town of Heidelberg are located within a few minutes of walking time, the Castle, the Old Bridge, the Cathedral, the Old University, Museums and the famous pedestrian zone with many historical buildings and historical sites.
